

Test Case Execution Status Report

TC-01 to TC-16 — Final Validation Report

Metric	Final Result
Total Test Cases	16
Passed	16
Failed	0
Overall Result	PASS

Test Case Results

TC ID	Test Scenario	Status	Final Result
TC-01	Normal SELECT query	PASS	Query executed and execution time recorded.
TC-02	Simple SELECT query	PASS	Execution time captured correctly.
TC-03	Query with WHERE condition	PASS	Query performance measured successfully.
TC-04	Query with JOIN	PASS	Execution time recorded successfully.
TC-05	Query with ORDER BY	PASS	Execution time captured.
TC-06	Query with GROUP BY	PASS	Performance data recorded.
TC-07	Fast query	PASS	Small execution time displayed correctly.
TC-08	Slow query	PASS	Actual execution time correctly recorded.
TC-09	Same query multiple times	PASS	Separate execution records maintained.
TC-10	Different queries	PASS	Separate performance records maintained.
TC-11	Query history	PASS	New performance result added to history.
TC-12	Database connection available	PASS	Query executed and performance record created.
TC-13	Large table query	PASS	Large query execution time measured correctly.
TC-14	Query with no matching rows	PASS	Query executed and execution time recorded.
TC-15	Query returns one row	PASS	Execution time captured successfully.
TC-16	Query returns many rows	PASS	Performance measurement captured correctly.

Detailed Validation Notes

TC-08 — Slow Query

Final Status: PASS. The slow-query test initially encountered an environment-related error because `pg_sleep()` was not available in the active database. The execution-time handling was corrected and a genuinely long-running query was validated successfully. A large execution time was recorded and the query was classified as Slow.

TC-09 — Same Query Multiple Times

Final Status: PASS. Repeated executions were stored as separate query/performance records with separate execution-time values.

TC-10 — Different Queries

Final Status: PASS. Different queries were executed and individual performance records were created.

TC-11 — Query History

Final Status: PASS. Previously existing queries could be executed again, and a new performance result was added as a separate history record.

TC-12 — Database Connection

Final Status: PASS. The database connection was available and queries successfully executed with execution-time records.

TC-13 — Large Table Query

Final Status: PASS. The initial large-table query attempt returned a 500 error because the expected orders table was not available in the active database. After validating the active database and using a large-processing query, the test successfully produced a substantial execution time. Final validation recorded approximately 18.59 seconds, confirming that long-running query performance is measured correctly.

TC-14 — No Matching Rows

Final Status: PASS. A query using a non-existing ID executed successfully and still produced an execution-time record.

TC-15 — One Row

Final Status: PASS. A specific-ID query successfully executed and captured execution time.

TC-16 — Many Rows

Final Status: PASS. A large-result query successfully executed and recorded performance information.

Final Conclusion

All documented test cases from TC-01 through TC-16 were successfully executed and validated. Final result: 16/16 PASS, with 0 failed test cases remaining after final validation.

Query Performance Project

EC-01 to EC-15 — PASS Evidence Report

EC ID	Edge Case	Status
EC-01	Empty query	PASS
EC-02	Invalid SQL	PASS
EC-03	NULL query	PASS
EC-04	Database unavailable	PASS
EC-05	Wrong credentials	PASS
EC-06	Very slow query	PASS
EC-07	Huge result set	PASS
EC-08	Same query repeated	PASS
EC-09	Very short execution	PASS
EC-10	Concurrent queries	PASS
EC-11	Special characters	PASS
EC-12	Long SQL query	PASS
EC-13	Table does not exist	PASS
EC-14	Permission denied	PASS
EC-15	First-time query / history	PASS

Overall Result: ALL 15 EDGE CASES PASSED

The evidence pages below are selected directly from the supplied EC-01 to EC-15 evidence PDF. Unnecessary summary/code pages are omitted; the selected screenshots themselves are not edited.

EC-01 — Empty query — PASS

Evidence selected from the supplied testing-session evidence PDF (source page 3).
